

REV B-ES1: HUMIDITY PATH ENGINEERING SAMPLE

WARNING: J1 pin 1 (TEMP/KTY) is deliberately unconnected. Bench supply only; do not attach to IDM before interface validation.

Input protection and 5 V power

ESP32-C3 DevKitM-1 and I2C DAC

0-10 V humidity output: $gain = 1 + 20.3k/10k = 3.03$

Validated design target: 24 V bench input, 0-10 V humidity output
KTY/TEMP terminal deliberately DNP pending input measurement
BENCH TEST ONLY - NOT RELEASED FOR CONNECTION TO IDM
IDM Smart Climate Platform

Sheet: /
File: IDM-FakeSensor-ESP.kicad_sch

Title: IDM Fake Sensor ESP - humidity engineering sample

Size: A4
KiCad E.D.A. 10.0.5

Date: 2026-08-07
